

P250

Roving for chopping

PRODUCT DESCRIPTION

P250 is a roving produced by assembling E-glass strands, wound without twist onto cylindrical cheeses. It has been designed for applications where chopped strands from rovings are necessary, and especially for:

- reinforcement of headliners
- manufacture of panels, complexes and felters
- reinforcement of plaster

PRODUCT REFERENCE

Example : EC 2400 P250
 E : Glass type
 C : Continuous Process
 2400 : Roving linear weight (tex)
 P250 : OCV™ Reinforcements code for sizing system

FEATURES AND PRODUCT BENEFITS

Excellent processing characteristics

Low static electricity

Easy unwinding at range of speeds normally used

Good splitting of the strands

Good chopping behaviour

Even and regular fibre distribution

Fast and complete wet-out

High glass content possible

High composite mechanical properties

TECHNICAL CHARACTERISTICS

Linear weight of roving (tex)	Loss on ignition (%)	Moisture (%)
ISO 1889	ISO 1887	ISO 3344
2450	0.75	< 0.20

P250

Roving for chopping

PRODUCTS AVAILABILITY

Product	Characteristics of cheeses			
	Diameter (mm)		Height (mm)	Net weight (kg)
	Internal	External		
EC 2400 P250	80	285	265	19

Individual weight of bobbin 6%. It is allowed maximum 5% non standard mass bobbins in one consignment. Minimum weight of bobbin is 15 Kg.

PACKAGING

Each cheese of P250 is protected by a shrink-wrap polythene film, which should not be removed when it is used, and is identified by an individual label. The bulk packaging unit is a pallet, which is protected by a carton cover and a shrink-wrap polyethylene film, with protections at the bottom, on the top and at the 4 corners. Each pallet contains 4 levels of 12 cheeses.

Products	Pallet approx. net weight* (kg)	Pallet Dimension L x W x H (cm)	Levels per pallet	Cheeses per level	Total number of cheeses per pallet
EC13 2450 P250	950	120 x 90 x 120	4	12	48

* Add approx. 40 kg to obtain gross weight.

STORAGE

P250 roving should be stored dry and in its original packaging. The best conditions are temperature between 15 and 35°C and a relative humidity between 35 and 85%. If the product is stored at low temperature (below 15°C) it is advisable to condition it in the workshop, for at least 24 hours before use, to prevent condensation. It is not allowed to store the pallets one of the top of another. This product must be used within 12 months of delivery.
